

BANNERS (BN)

G&S Acoustics' Banners (BN) are our **most economical sound-absorbing ceiling product**. Draped throughout an open ceiling, Banners effectively reduce the sound reverberation in any room. Banners can also be used with an acoustical ceiling to enhance its sound absorption.

Our Banners are mechanically fastened to the ceiling deck and pulled taut to the ceiling to add design, color and outstanding sound absorption to your room while remaining out of harm's way. Since many large venues, such as arenas, stadiums and cafeterias have hard ceilings, Banners are an ideal option for acoustical treatment.

CORE
.75-1.65 pcf fiberglass, various thicknesses available

SIZES
Any size up to 4'x25'

MOUNTING
Painted washers
Stiffeners

FINISH
Nylon, PVC

EDGES
Natural

FLAMMABILITY
All components have a Class "A" rating per ASTM E84
